ABOUT US

Palash Care, 'Elderly Day Care & Recovery Center For All', aims to provide top-notch care to the elderly & post-hospitalization care to people of all ages. The center has been designed to provide complete care & comfort in a homely atmosphere. Here elderly persons will get a cosy place and caring staff round the clock, tending to all their personal and medical needs. Here people of all ages will get an encouraging and supportive environment and individual attention that will help them to recover & bounce back to their fittest-self after being discharged from the hospital.

We at **Palash Care** provide 24x7 personal & medical care through trained nursing, physical therapy & ancillary staff. Our care staff coordinate with your physician and family members and attend to your each and every need. We have also tied up with renowned hospitals to take over the care if an elderly or a recovering patient slips into some complication and needs emergency medical care.

Palash Care works seamlessly on different domains and can effortlessly cater to people looking for an old age home or geriatric center, recovery unit following hospitalization, or a place with a dash of palliative and post-operative care. We not only cater to elderlies or senior citizens but also look after critically ill young adults who need substantial care and medical support.

Video calling

SERVICES

We at Palash aim to provide the best of personal and medical care to our guests - old and young. Here is a range of services we offer -

OLD AGE / GERIATRIC CARE

Geriatric or old age care management is the process of planning & coordinating care of the elderly to meet their long term care needs, improve their quality of life, & maintain their independence for as long as possible.

Our staff is trained in tending to the needs of people who are old and frail or people with some chronic or degenerative diseases. These elderly need continuing support once they leave hospital, as their illness may prevent them from leading an independent life.

ASSISTED CARE (LONG TERM & SHORT TERM)

Aging parents and their working children face these challenging situations when the parent has had a fall or undergone a surgery which requires skilled care for weeks or months to follow. We take that responsibility. Short term services last several weeks or few months while the patient is recovering from a sudden illness, injury or surgery. In these instances, a skilled nurse may be needed for dressing wounds, dispensing medications and monitoring vital signs.

Palash offers long term and short term assisted care to meet all these needs while enabling the elders to continue living as independently as he/she wants.

REHABILITATION

Rehabilitation is a treatment or treatments designed to facilitate the process of recovery from injury, illness, or disease to as normal a condition as possible. The purpose of rehabilitation is to restore some or all of the patient's physical, sensory, and mental capabilities that were lost due to injury, illness, or disease. We have complete personal and medical care services for full rehab or recovery.

TERMINAL CARE

Terminal care is for a long-term illness which may or may not be curable. We take utmost care in ensuring solutions for quality of stay and well-being.

We also provide emotional support to the patients & their families.

OLD AGE HOME – SHELTER FOR SENIORS

Palash offers old age home facility as well - a residence where senior citizens are looked after & cared for. Old age often brings along loneliness, boredom, fatigue & tendency to give up easily. However, at our facility, elderly can engage in meaningful activities, nurture their hobbies and find joy in creative pursuits. Specially trained geriatric doctors, trained nurses and other care givers are available round the clock for day to day routine.

POST-OPERATIVE CARE (CARE AFTER DISCHARGE FROM HOSPITAL)

Postoperative care is the care you need after a surgical procedure. It includes pain management, physiotherapy, medication and wound care. The type of postoperative care you require depends on the type of surgery you have undergone. Postoperative care begins immediately after surgery for the duration of your hospital stay, and continues after your discharge from the hospital.

Depending on the type of surgery you have gone through, there are many potential complications in the postoperative period. General complications include infection, problems at the surgical site, bed sores & blood clots due to inactivity. Prolonged inactivity may cause loss of muscle strength & mobility etc.

In some cases, you may not be able to care for yourself for a time after surgery. If so, you will need a care giver to treat wounds, prepare food, or help you move around safely. If you don't have a family member or friend who can look after and help you in right post-operative care, Palash welcomes you till the time you recover.

DAY CARE/ SHORT TERM STAY

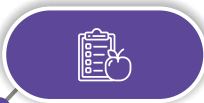

Palash Care welcomes your aging parents for a day visit or a short term stay as well. If you are working, want to go for holiday (short term), any project abroad which demands travel for a few weeks, **Palash Care** is an excellent & a safe alternative for the elderly to stay.
